

## HISTORY

Our company started to work in 1989 with the aim to give fast, modern and highest quality customs clearance services to the companies who follow up world trade increase trend.

Our company change the name to **ÖZ GÖK GÜMRÜK MÜŞAVİRLİĞİ** in 2000 and has been giving service in Istanbul Central Office.

Believing in the importance of technology, we pioneered in automation sector by integrating our system with central computer system in 2001. We built our internet server in 2002 enabling us to follow and finish customs operations over internet.

We have been giving customs clearance and consultation services to technology companies of the sector since 1993 and have gained wide and deep know-how on the clearance of telecommunication and IT products.

With its very talented and experienced personnel, we continue to give best services to our esteemed customers.

## ABOUT US

### Our Vision

Our service policy is our vision. The pace of our services, honesty, respect to ourselves and our environment, our young and dynamic status, our will to follow up technology and progress with technology and our determination to please our customers is our basic characteristic that distinguishes us from other companies.

### Our Mission

In the globalizing World where the borders evaporate, foreign trade operators have very important mission in both developing international trade and protecting national interests. Our mission is to realize this mission together with serving our national interests by applying the local regulations and rules.
